

MOHAMMADREZA SALEHI

Backend Developer

mohammadsalehi8138@gmail.com | (+98) 935 255 4850 | Istanbul, Türkiye
LinkedIn | Date of Birth: 2002-05-29 | Military Service: Medical Exemption

Profile Summary

Dynamic Backend Developer with 4+ years of experience engineering scalable microservices, RESTful APIs, and asynchronous data pipelines. Highly skilled in Python (FastAPI, Django) and modern data engineering, with proven expertise in building complex automated scraping architectures, ERP portals, and workflow orchestration systems. Proficient in designing AI agent architectures and leveraging advanced LLM orchestration tools (e.g., Dify.ai, Claude Code) to build intelligent, production-grade workflows. Passionate about solving structural challenges and building high-performance, AI-driven solutions.

Skills

Programming	Python (FastAPI, Django, Flask), JavaScript, SQL, Asynchronous Programming
Databases	PostgreSQL, MySQL, MongoDB, Elasticsearch, Redis
DevOps & Architecture	Docker, RabbitMQ, Microservices, RESTful APIs, Git, Linux (Ubuntu)
Data Eng. & Scraping	Scrapy, Zyte APIs, Octoparse, Automated Workflows
LLM Orchestration & AI	Dify.ai, Claude Code, Complex Prompt Frameworks, AI Agent Workflows, Token Metric Tracking

Work Experience

Backend Developer - National Center of Cyberspace

Tehran, Iran / Remote | [Month, Year] - Present

- Engineered and deployed a comprehensive corporate Enterprise Resource Planning (ERP) portal to streamline organizational processes.
- Designed scalable architectural models for the enterprise portal using Python and Django.
- Optimized backend scripts and handled complex database queries to ensure high performance and data integrity across the platform.

Backend Developer - Jaryan (No-Code Workflow Orchestration)

Remote | [Month, Year] - Present

- Architected and deployed robust backend task execution pipelines for a no-code workflow orchestration platform using FastAPI.

- Synchronized complex data flow logic and automated canvas positioning with a ReactFlow frontend.
- Handled asynchronous operations and database migrations to ensure high availability.

Backend Developer - MoboNews

Tehran, Iran | Aug 2022 - Aug 2025

- Transformed a WordPress-based project into multiple independent services using microservices architecture.
- Implemented coding standards for handling high request volumes, boosting reliability and uptime.
- Karpol Education Platform: added video uploads, format conversion, and auto-subtitle translation (Google API).
- Price List Crawler: automated pricing updates with Elasticsearch to improve accuracy and search speed.
- Natelo (Swiss Retail Chain): developed Buyback/Repair services including APIs, admin panel, branch notifications, and reservation system. Implemented intelligent pricing engine compliant with Swiss regulations.

Backend Developer - GoldenKey

Tehran, Iran | Nov 2021 - Aug 2022

- Migrated a monolithic application to microservices architecture, improving scalability and performance.
- Designed secure RESTful APIs for Vidamag (a video-sharing platform), ensuring robust data handling.
- Built a video transcoding microservice with Docker and RabbitMQ for dynamic scaling under peak loads.
- Developed a secure Single Sign-On (SSO) system for cross-platform authentication.

Freelance & Parallel Projects

Backend & Data Engineer - AI-Driven Retail Purchasing Assistant

Remote | [Month, Year] - Present

- Conceptualized and engineered the backend architecture for a targeted marketplace advisor system.
- Built automated web scraping engines to harvest and monitor real-time domestic retail inventory.
- Evaluated structural limitations and optimized extraction pipelines for AI models.

Backend & Data Engineering - Football Match Data Crawler

Remote | Feb 2025 - Present

- Developed resilient crawlers scraping 500,000+ football matches from transfermarkt.com.
- Designed anti-blocking strategies for continuous, large-scale data collection.
- Normalized raw datasets into clean, structured formats optimized for AI/ML training.

Full-Stack & DevOps - MrTrader Academy

Remote | Mar 2025 - Jul 2025

- Delivered mrtrader.net end-to-end (backend, frontend, infrastructure).
- Leveraged AI-assisted tooling for frontend, while ensuring production quality.
